BELLE ISLE PUMPING STATION DETROIT WATER & SEWAGE DEPARTMENT

This project consisted of furnishing and installing all of the electrical, instrumentation and control work necessary to accommodate new pumps and motors at Belle Isle Pumping Station. This project was critical for the DWSD in that the new instrumentation installed called "OVATION" allows pumps to be operated remotely. This completed project ultimately makes the City of Detroit operate this facility more efficiently and profitable.

Project Manager: Chuck Crane

Project Supervisor: Rudy Theil

Project Duration: 18 months

Project Volume: \$2.6 Million | Customer: Walsh Construction
