

The Palace of Auburn Hills

Project Size: \$350,000

This extensive lighting project was a design by the Daktronics Company. Bayview's responsibility was to remove the existing lighting and install perimeter and scoreboard lighting throughout the Palace. It included the dismantling of existing lighting and the installation of new programmable technology lighting around the perimeter of the Palace as well as the scoreboard. The schedule was a highlight of this project due to the necessity for Bayview to complete the entire project within a critical period of two events at the Palace.

Project Manager:
Tony Maisono

Project Field Supervisor:
Aaron Sypolt

Customer: Daktronics
The Palace of Auburn Hills

Project Duration :
12 Days
